### Profile

Full stack software engineer with 6+ years of experience shipping high traffic ecommerce features at scale. Led major checkout and subscription refactors driving measurable conversion gains, owned accessibility initiatives across multiple clients, and worked daily across Vue, React, Node, Java, and cloud-backed systems.

### Skills

#### Core Stack

- TypeScript, JavaScript, Python
- Vue (2 & 3), React, Next.js
- Node.js (Express), Java (Spring Boot)

#### Mobile

- React Native, Expo, Flutter

#### Cloud & Data

- PostgreSQL, SQLite, MongoDB
- REST APIs, GraphQL

#### Quality & DX

- Playwright, Cypress, Maestro, Jest, Mocha, Chai, Vitest
- Accessibility (WCAG, automated testing, ADA linter tools)

### Professional Experience

#### Software Developer, *Panera Bread*

May 2021 – present | St. Louis, MO

- Developed scalable web applications for Panera's retail ecommerce website (Vue2, TypeScript), catering website (Vue3, Angular, Java Spring Boot), middleware app (Express/Node), and an e2e automation testing app (Playwright/JavaScript).
- Collaborated with several cross functional teams (product, development, design, scrum masters, analysts, tech lead, qa, etc) to break down wireframes and create efficient solutions with design, accessibility, security, and user experience in mind.
- Owned accessibility strategy across multiple production applications, implementing automated testing, audits, and developer training to meet WCAG standards at scale.
- Completely refactored subscriptions flow, leading to a 9% increase in conversion.
- Led architecture and implementation of a full checkout UX overhaul, improving maintainability and supporting conversion focused iteration.
- Made ongoing contributions to a React Native/Expo app for a cross platform client that encompasses Kiosk, iOS, Android, and web
- Led migration efforts from Vue 2 to Vue 3, refactoring web components to ensure compatibility and improve maintainability
- Mentored junior developers, conducting code reviews and knowledge-sharing sessions to enhance team efficiency and code quality

#### Software Developer (Contract), *Alpine Alex*

November 2019 – October 2021 | St. Louis, MO

- Developed, rewrote, and maintained several applications with React, Gatsby, React Native, Wordpress, Next.js and Firebase.
- Created reusable templates for clients, added advanced custom forms to allow clients to author content without requiring development effort
- Set up automation via Zapier to link Gravity Forms to Google Sheets and ClickSendSMS

#### Web Developer (Contract), *Klobomedia*

December 2019 – March 2020 | St. Louis, MO

- Contributed to Shopify and SquareSpace websites to create elegant solutions with SASS/JavaScript that CMS editors could not reach
- Consulted clients on responsive designs and accessibility
